Autodesk®

12 Steps To Success

- 1 Select Products
- 2 Read the Installation Guide included with your package
- 3 Verify System Requirements
- 4 For each product, choose:
 - License Type
 - Stall Type
 - Delivery Method
- 5 Install and Configure Network License Manager if required
- 6 Create Deployments if required
- 7 Create System Images if required
- 8 Assure all products are registered
- 9 Install Software to Workstations
- 10 Activate Stand Alone Licensed Products
- 11 TEST EVERYTHING!
- 12 Open the door to your students

Deployment of Autodesk 2008 Software on a Network

Key Points and Tips

Creating a Successful Deployment

Select one of the options listed below.

➤ *Option 1 - New Streamlined Procedure*

In the 2008 versions of the ADSK products you have the ability to install the AutoCAD based products as a network directly from the DVD/CD media. This eliminates the need to create the deployment files like you have had to in the past. This procedure requires ghosting of this station to the rest of the lab.

➤ *Option 2 - Old Installation Procedure*

You can continue to perform your installation as you have in previous years by copying the DVD/CD media of the product to the drive on which the deployments reside and then running the deployment from the copy you have created. Start setup32.exe.

NOTE: Option 2 can now take several up to 6 hours if performed from the DVD/CD.

Choose Implementation Methods

Connectivity	License Type		Install Type		Delivery Method			
	MSSA	Network	Interactive	Deployment	Interactive	Automated	Push	Image
No Network, No Internet	Yes	No	Yes	No	Yes	No	No	Yes*
Network, No Internet	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
No Network, Internet	Yes	No	Yes	No	Yes	No	No	No
Network, Internet	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Remember

- Register your products prior to allowing students to run them.
- Always use the same logon name and password to register products.
- To install products, apply service packs and perform license management tasks. Administrative Privileges are required.
- Please test EVERYTHING before opening the lab doors to your students!
