

## **Switching AutoCAD 2009 from Ribbon interface to Classic interface**

To switch to the Classic AutoCAD menus in AutoCAD 2009 you just need to click on the cog icon in the lower right hand corner.

When you click on this Icon you will get a list of the interfaces that you can change to. AutoCAD Classic is one of the choices. Once you have made this change to the interface, AutoCAD 2009 will open with the classic interface for the windows user that is logged into the computer as long as you do not have Deepfreeze or similar software turned on when you make the change.
