

INVENTOR RUNNING WITH NETOP SCHOOL

The setting changes below will adjust the display when using NetOp with Inventor. These changes need to be made on all of the computers with which you plan to share your screen via NetOp.

1. Right-Click on the desktop and select Properties.
2. Click the "Settings" Tab. Then Click the Advanced button in the lower right corner of the "Settings" tab. Select the Troubleshooting Tab, and move the slider to around 3/4 of full. (The screen should display "Disable all DirectDraw and Direct3D accelerations...")
3. Apply the changes and close out of the dialog box.

For Older versions of Inventor (Version 11 and prior) you will also need to do the following.

4. Open Inventor.
5. Cancel out of the New/Open Dialog.
6. Click the Tools Pull Down, and then select Application Options
7. Select the Hardware Tab.
8. Select the option to Use Microsoft GDI Generic OpenGL Driver.
9. Click OK to close out of dialog.
10. Close out of Inventor.
11. Open Inventor and start a new part file.
